Projects

1. Online Shopping Cart System

Developed a full-stack e-commerce platform with separate modules for Admin and User. The admin panel allowed for managing product inventory and users could browse items, filter by category, etc.

2. Online Car Website

Designed and developed a responsive car website to showcase company details, vehicle listings, service offerings, and customer interaction features , dynamic pages for Home, About, Services, New Cars and so on.

3. College lab management System

Built a web-based system to streamline laboratory management by handling equipment inventory, lab schedules, and user roles.

4.Personal Portfolio

Developed a personal portfolio about interaction of my details.
